

Years 4 Parents

6th November 2018

BYOD 2019

Parent Information Sessions

We will be holding two parent information sessions outlining the BYOD program in 2019 for students in Years 5/6. All students in Years 5 and 6 will participate in this program in 2019 and it is important that all parents attend one session. These sessions will be held at:

Session 1: 6.00pm Thursday 15th November in the 5/6 Classrooms

Session 2: 4.00pm Thursday 22nd November in the 5/6 Classrooms

Please register your attendance for **one** of the sessions at:

<http://bit.ly/BYOD2019>

The information sessions will be an opportunity to learn about the educational rationale for the BYOD program and its practical implications. It will help to outline the role of students, teachers, school and families in a BYOD teaching and learning environment. Most importantly it will provide parents with the opportunity to hear and participate in the vision for teaching and learning in the upper years of the school. Information will be handed out during the evening for all parents, students are not required to attend the evening.

St Benedict's School continually seeks to develop opportunities for students to develop as highly engaged and independent learners who can flourish in today's world. Students will be asked to bring a mobile technology device to significantly enhance their learning of 21st Century skills in critical thinking, collaboration, communication and creativity.

We look forward to sharing this important vision for learning in the Senior Years at St Benedict's.

Kind regards,

Melanie Stratford
